United Nations

Nations Unies

The **Department of Economic and Social Affairs** of the United Nations is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which United Nations Member States draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

Le **Département des affaires économiques et sociales** des Nations Unies assure un rôle essentiel de liaison entre les politiques mondiales en matière économique, sociale et environnementale et les initiatives engagées au niveau national. Le Département articule son action autour de trois grands axes qui se recoupent : i) il compile, génère et analyse un large éventail de données et informations économiques, sociales et environnementales dont se servent les États Membres de l'Organisation pour examiner les problèmes communs et évaluer les diverses options possibles; ii) il facilite les négociations entre les États Membres au sein de nombreux organes intergouvernementaux sur les mesures communes à prendre pour trouver une solution aux problèmes mondiaux, en cours ou émergents; et iii) il donne aux gouvernements intéressés des avis sur les moyens utilisables pour traduire en programmes nationaux les cadres politiques élaborés lors des conférences et des sommets des Nations Unies et, à travers l'assistance technique, il contribue à renforcer les capacités nationales.

DISCLAIMER

The designations employed and the presentation of the material in the present publication do not imply the expression of any opinion whatsoever on the part of the United Nations concerning the legal status of any country or of its authorities, or the delimitations of its frontiers. The term "country" as used in this report also refers, as appropriate, to territories or areas. The designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgement about the stage reached by a particular country, territory or area in the development process. Mention of the names of firms and commercial products does not imply endorsement by the United Nations. The symbols of United Nations documents are composed of capital letters and numbers

CLAUSE DE NON RESPONSABILITE

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent, de la part de l'Organisation des Nations Unies, aucune prise de position quant au statut juridique des pays ou de leurs autorités, ni quant au tracé de leurs frontières ou limites. Le terme « pays » utilisé dans le texte renvoie aussi, s'il y a lieu, à des territoires ou des régions. Les appellations des groupes de pays n'ont été utilisées qu'aux fins de présentation des statistiques ou pour la commodité de l'analyse, et n'impliquent pas nécessairement l'expression d'une opinion quant au niveau de développement des pays, territoires ou régions. La mention de certains noms de société ou de certaines marques commerciales ne signifie pas que l'Organisation des Nations Unies apporte sa caution à ces sociétés et à ces marques. Les cotes des documents de l'Organisation des Nations Unies se composent de lettres et de chiffres. La simple mention d'une cote renvoie à un document de l'Organisation.

*Division de statistique des Nations Unies
New York
Le 31 décembre 2024*

Introduction

The objective of this publication is to present current monthly economic and social statistics for most of the countries and territories of the world. In addition, each month a selection of tables shows annual and/or quarterly data on subjects illustrating important socio-economic trends and developments.

All data published in this edition are available in electronic format in the online version of the *Monthly Bulletin of Statistics* (MBS Online, see <http://unstats.un.org/unsd/mbs/>). The MBS Online typically presents longer time series than the print version.

Sources

The statistics appearing in the *Bulletin* are obtained by the Statistics Division of the United Nations and the international statistical services from official sources in the countries. International sources for the *Bulletin* include the Food and Agriculture Organization of the United Nations, International Civil Aviation Organization, International Civil Service Commission, International Labour Office and the International Monetary Fund.

To access countries' or areas' national statistical office websites for more information, consult http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp.

Comparability of the data

Data definitions are provided for the statistical terms in the tables. These present the internationally recommended statistical terms and definitions in current use. Where individual series differ fundamentally from the descriptions in the note, the differences are indicated in footnotes.

Where a significant break in the homogeneity of a particular national series occurs, the point at which the break occurs is indicated by the symbol “#”; the nature of the change is generally described in a footnote.

Revisions and changes in tables

Each issue contains all the revisions made in the figures up to the date of publication of the *Bulletin*. In general, figures for the latest months are to be regarded as provisional.

Starting May 2019, tables 4, 5 (Index of industrial production), 20-28, 32 and 33 (Mining, Manufacturing, Construction) were temporarily suspended as a result of decision 50/112 in the report of the fiftieth session of the Statistical Commission (E/2019/24/CN.3/2019/34) regarding the transfer of the mandate for collection of industrial statistics from the United Nations Statistics Division to the United Nations Industrial Development Organization.

Starting July 2021, tables 18, 19 and 34-39 (Fuel imports and International merchandise trade) were temporarily suspended as a result of the United Nations Statistics Division, Trade Statistics Section ending production of these tables.

Starting August 2022, the above tables were fully removed. In addition, tables 9-12 (Employment, unemployment and earnings), 13-17 (Energy) and 43-50 (Finance) were removed due to data being available from other sources and cessation of the production of these tables.

Time period

As far as possible, the figures are given for the calendar years 2010-2024 inclusive and for the most recent 18 months. In general, the annual figures are expressed as monthly averages; exceptions are indicated. For the registration of new motor vehicles, annual totals are shown.

Units of measurement

Metric units are used in all tables in which the data are measured in weight, volume, length or area.

Rounding of figures

When necessary, figures are rounded off to the nearest final digit. For this reason, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown in some series.

Symbols employed

The following symbols have been used throughout the *Bulletin*.

- . Not applicable.
- ... Not available.
- Magnitude zero.
- C Confidential data.
- * Provisional, preliminary or estimated figure.
- ◆ Monthly average for quarter or index for quarter.
- # Marked break in series.

Decimal figures are always preceded by a period (.).

Country notes and nomenclature

Designations which have changed:

Cabo Verde — Previously translated as Cape Verde.

Czechia — Formerly Czech Republic.

Eswatini — Formerly Swaziland.

Netherlands (Kingdom of the) — Formerly Netherlands.

North Macedonia — Formerly The Former Yugoslav Republic of Macedonia.

Russian Federation — The statistical data for the Russian Federation refers to information provided by the Russian Federation and where indicated includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

State of Palestine — Formerly Occupied Palestinian Territory.

Sudan, South Sudan — South Sudan became an independent State on 9 July 2011 and a Member of the United Nations on 14 July 2011. Data for each country, where available, are shown separately. Data presented for the period prior to July 2011, shown under the heading “Sudan”, may refer to Sudan and South Sudan.

Türkiye — Formerly Turkey.

Ukraine — On 28 July 2014, the Government of Ukraine informed the United Nations that it is not in a position to provide statistical data concerning the Autonomous Republic of Crimea and the city of Sevastopol.

Introduction

Le objectif de cette publication est de présenter mensuellement des statistiques économiques et sociales actuelles pour la plupart des pays et territoires du monde. De plus, on y trouve une série de tableaux qui contiennent des données annuelles et/ou trimestrielles illustrant les principales tendances et développements socio-économiques.

Toutes les données publiées dans ce numéro sont disponibles en format électronique dans la version en ligne du *Bulletin mensuel de statistique* (BMS en ligne, disponible à : <http://unstats.un.org/unsd/mbs/>). En ligne, le BMS permet des séries chronologiques/ temporelles plus longues que dans la version imprimée.

Sources

Les statistiques publiées dans le *Bulletin* ont été obtenues par la Division de statistique des Nations Unies et par les services statistiques internationaux de sources officielles dans les pays. Les sources internationales pour le *Bulletin* incluent la Commission de la fonction publique internationale, l'Organisation des Nations Unies pour l'alimentation et l'agriculture, l'Organisation de l'aviation civile internationale, le Bureau international du travail et le Fonds monétaire international.

Pour accéder aux sites web des offices statistiques nationaux pour plus d'information, consultez http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp.

Comparabilité des données

Les définitions des données sont fournies pour les termes statistiques dans les tableaux. Elles présentent des termes et définitions recommandés internationalement qui sont d'usage courant. Lorsqu'une série s'écarte de manière fondamentale de la définition donnée dans la remarque, la divergence est signalée en note.

S'il y a une discontinuité dans l'homogénéité d'une série statistique d'un certain pays, le point où se produit la coupure est indiqué par le signe "#"; la nature de changement est généralement mentionnée en note.

Révisions et changements dans les tableaux

Chaque numéro contient toutes les rectifications apportées aux chiffres à la date de la publication du *Bulletin*. En général, les chiffres des derniers mois doivent être considérés comme provisoires.

À compter de mai 2019, les tableaux 4, 5 (Indice de la production industrielle), 20 à 28, 32 et 33 (Activités extractives, Industries manufacturières, Construction) ont été suspendus en raison de la décision 50/112 de la cinquantième session de la Commission de statistique (E/2019/24E/CN.3/2019/34) concernant le transfert du mandat de collecte de statistiques industrielles de la Division de statistique des Nations Unies à l'Organisation des Nations Unies pour le développement industriel.

À compter de juillet 2021, les tableaux 18, 19 et 34 à 39 (Importations de produits énergétiques et Commerce international) ont été temporairement suspendus en raison de la fin de production de ces tableaux par la Division de statistique des Nations Unies, section des statistiques du commerce.

À compter de août 2022, les tableaux ci-dessus ont été entièrement supprimés. En outre, les tableaux 9 à 12 (Emploi, chômage et gains), 13 à 17 (Énergie) et 43 à 50 (Finances) ont été supprimés en raison de la disponibilité de ces tableaux auprès d'autres sources et de l'arrêt de la production de ces tableaux.

Période couverte

Les statistiques sont présentées sous forme de séries chronologiques. Autant que possible, les chiffres donnés sont des chiffres annuels pour 2010-2024 et des chiffres mensuels pour les derniers dix-huit mois. En général, les chiffres annuels sont présentés en moyennes mensuelles; il y a des exceptions qui ont été marquées. Pour l'immatriculation des véhicules automobiles neufs, les totaux annuels sont présentés.

Unités de mesure

Le système métrique est utilisé dans tous les tableaux dont les données sont mesurées en poids, volume, longueur ou surface.

Arrondissement de chiffres

Chaque fois qu'on l'a jugé nécessaire, les nombres ont été arrondis à l'unité. Il peut donc y avoir, pour certaines séries, une légère différence entre la somme des éléments constituants et le total indiqué.

Signes conventionnels

Les signes ci-après ont été utilisés dans le *Bulletin*.

- Ne s'applique pas.
- ... Aucune donnée disponible.
- Résultat rigoureusement zéro.
- C Données confidentielles.
- * Donnée provisoire ou estimation.
- ◆ Moyenne mensuelle pour le trimestre ou indice pour le trimestre.
- # Une discontinuité notable dans la série.

Les décimales sont toujours précédées d'un point (.).

Notes sur les pays et nomenclature

Désignations changées :

Cabo Verde — Traduit précédemment par Cap-Vert.

Eswatini — Ex Swaziland.

État de Palestine — Ex Territoire occupé palestinien.

Fédération de Russie — Les données statistiques pour la Fédération de Russie ont trait aux informations fournies par la Fédération de Russie et, là où cela est indiqué, incluent des données statistiques sur la République autonome de Crimée et la ville de Sébastopol (Ukraine) temporairement occupées par la Fédération de Russie.

Macédoine du Nord — Ex L'ex République yougoslave de Macédoine.

Pays-Bas (Royaume des) — Ex Pays-Bas.

Soudan, Sud-Soudan — Le Sud-Soudan est devenu un Etat indépendant le 9 juillet 2011 et membre de l'Organisation des Nations Unies le 14 juillet 2011. Les données relatives à chaque pays, lorsqu'elles sont disponibles, sont présentées séparément. Les données présentées pour la période antérieure à juillet 2011,

Introduction

sous le nom du «Soudan», peuvent se rapporter aux Soudan et Sud-Soudan.

Tchéquie — Ex République tchèque.

Türkiye — Ex Turquie.

Ukraine — Le 28 juillet 2014, le gouvernement Ukrainien a informé l'ONU qu'il n'est pas en mesure de fournir des données statistiques concernant la République autonome de Crimée et la ville de Sébastopol.

Population estimates

Mid-year: thousands *[continued]*

Estimations de la population

Au milieu de l'année : en milliers d'habitants *[suite]*

Source:

United Nations Statistics Division, Demographic Statistics Database and country responses to the Monthly Bulletin of Statistics questionnaire.

Note:

Figures shown in italics indicate estimates of uncertain reliability. This table includes only official national population estimates reported to the United Nations Statistics Division. For United Nations population estimates, refer to the United Nations Population Division's Internet site: www.unpopulation.org.

* Provisional.

a 'Code' indicates the source of the data, as follows:

DF Population de facto.

DJ Population de jure.

1 Data refer to the settled population based on the 1979 Population Census and the latest household prelisting. The refugees of Afghanistan in Iran, Pakistan, and an estimated 1.5 million nomads, are not included.

2 Population statistics are compiled from registers.

3 Data refer to 1 January.

4 Data refer to national projections.

5 Including armed forces stationed in the area.

6 Postcensal estimates.

7 Based on the results of the 2011 Population Census.

8 Data based on the 2010 Population Census.

9 Based on the results of the 2016 Population Census.

10 Based on the results of the 2021 Population Census.

11 Based on population registers.

12 Data are estimates from Sample Vital Registration System (SVRS).

13 Data refer to 31 December.

14 Average annual population based on the final data of 2019 Population Census.

15 Data refer to annual average population.

16 Source: Figures are derived using administrative data from the Ministry of Health.

17 Projections based on the 2013 Population Census.

18 Data refer to projected figures based on the Population and Housing Census 2005 (district projection).

19 Data refer to 30 May. Estimates or projections based on the 2017 Population Census.

20 Data refer to 30 June.

21 Based on the results of the 2022 Population Census.

22 Data include persons in remote areas, military personnel outside the country, merchant seamen at sea, civilian seasonal workers outside the country, and other civilians outside the country, and exclude nomads, foreign military, civilian aliens temporarily in the country, transients on ships and Indian jungle population. Projection of the population of Brazil and Federation Units by sex and age for the period 2010-2060.

23 Source: 2016 Population and Housing Census Update.

24 Excluding foreign diplomatic personnel and their dependants. Data based on the 2008 Population Census.

25 Data based on the 2019 Population Census.

26 Source: Population projections and estimates of priority targets for the various health programs and interventions, National Institute of Statistics (2016).

Mid-year: thousands *[continued]*

Estimations de la population

Au milieu de l'année : en milliers d'habitants *[suite]*

- 33 Data refer to 31 December. For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan province of China. Data have been estimated on the basis of the annual National Sample Survey on Population Changes.
- 34 Data are revised projections taking into consideration also the results of the 2018 census.
- 35 Data are revised estimates and projections as of March 2023.
- 36 Based on the annual national household survey and the 2011 population census.
- 37 The source of data is the national household survey.
- 38 Based on the results of the 2014 Population Census.
- 39 Data refer to government controlled areas.
- 40 Excluding Faroe Islands and Greenland shown separately, if available. Population statistics are compiled from registers.
- 41 Excludes nomadic Indian tribes.
- 42 Data refer to national projections based on 2007 census. Source: El Salvador National Population Estimates and Projections 2005-2050 (2021 revision).
- 43 Estimates or projections based on the 2015 population census.
- 44 Estimates based on the 2000 quick population count results and 1995, 2002 and 2010 Eritrea Demographic and Health Surveys.
- 45 Data refer to national projections based on 2007 census.
- 46 Estimates considering also the results of the 2007 Population Census.
- 47 Data refer to 17 September.
- 48 Excluding Åland Islands.
- 49 Excluding diplomatic personnel outside the country and including members of alien armed forces not living in military camps and foreign diplomatic personnel not living in embassies or consulates.
- 50 Data refer to 31 December. Excluding military personnel, visitors and transients.
- 51 Data refer to usual resident population.
- 52 Excluding data for Saint Barthélemy and Saint Martin.
- 53 Data refer to 31 March.
- 54 Population in households only. Postcensal estimates.
- 55 Estimates based on high variant projections.
- 56 Projections produced by l'Institut Haïtien de Statistique et d'Informatique (IHSI) and the Latin American and Caribbean Demographic Centre (CELADE) - Population Division of ECLAC.
- 57 Data refer to registered resident population.
- 58 Includes data for the Indian-held part of Jammu and Kashmir, the final status of which has not yet been determined. Data are projections based on the 2011 Population Census.
- 59 Data are based on the publication: "Indonesia Population Projection 2015-2045"
- 60 Data are based on Indonesia population census of 2020 and population projection for 2020-2050.
- 61 Data refer to the Iranian Year which begins on 21 March and ends on 20 March of the following year.
- 62 Data refer to 1 January. Data refer to usual resident population.
- 63 Data refer to 30 April.
- 64 Data refer to 31 May.
- 65 Data refer to 30 June. Includes data for East Jerusalem and Israeli residents in certain other territories under occupation by Israeli military forces since June 1967. Data refer to Israeli citizens and permanent residents who are listed in the Population Register.
- 66 Because of rounding, totals are not in all cases the sum of the respective components.
- 67 Data refer to 1 January. Postcensal estimates.
- 33 Données se rapportent au 31 décembre. Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et l'île de Taïwan province de Chine. Les données ont été estimées sur la base de l'enquête annuelle "National Sample Survey on Population Changes".
- 34 Les données sont des projections révisées tenant compte également des résultats du recensement de 2018.
- 35 Les données sont des estimations et des projections mises à jour en mars 2023.
- 36 D'après les données de l'enquête annuelle nationale des ménages et les résultats du recensement de la population de 2011.
- 37 La source des données est l'enquête nationale des ménages.
- 38 D'après les résultats du recensement de la population de 2014.
- 39 Les données se rapportent aux zones contrôlées par le Gouvernement.
- 40 Non compris les îles Féroé et le Groenland, qui font l'objet de rubriques distinctes, si disponible. Les statistiques de la population sont compilées à partir des registres.
- 41 Non compris les tribus d'Indiens nomades.
- 42 Les données sont des projections nationales d'après les résultats du recensement de la population de 2007. Source : Les estimations et projections nationales de la population du Salvador pour les années 2005 - 2050 (révision de 2021).
- 43 Estimations ou projections fondées sur les résultats du recensement de la population de 2015.
- 44 Des estimations fondées sur le dénombrement rapide de la population de 2000 et sur les enquêtes érythréennes de la démographie et de la santé de 1995, 2002 et 2010.
- 45 Les données sont des projections nationales d'après les résultats du recensement de la population de 2007.
- 46 Estimations en prenant en considération les résultats du recensement de la population de 2007.
- 47 Données se rapportent au 17 septembre.
- 48 Non compris les îles d'Åland.
- 49 Non compris le personnel diplomatique hors du pays et y compris les militaires étrangers ne vivant pas dans des camps militaires et le personnel diplomatique étranger ne vivant pas dans les ambassades ou les consulats.
- 50 Données se rapportent au 31 décembre. Non compris les militaires, ni les visiteurs et transients.
- 51 Les données se réfèrent à la population résidente habituelle.
- 52 Non compris les données pour Saint Barthélemy et Saint Martin.
- 53 Données se rapportent au 31 mars.
- 54 Population dans les ménages seulement. Estimations postcensitaires.
- 55 Des estimations fondées sur des projections de variante élevée.
- 56 Les données sont projections produits par l'Institut Haïtien de Statistique et d'Informatique (IHSI) et le centre démographique de l'Amérique latine et les Caraïbes - Division de la population de la CEPALC.
- 57 Les données concernent la population enregistrée résidente.
- 58 Y compris les données pour la partie du Jammu et du Cachemire occupée par l'Inde dont le statut définitif n'a pas encore été déterminé. Projections fondée sur le recensement de la population de 2011.
- 59 Les données sont basées sur la publication : << Indonesia Population Projection 2015-2045 >>
- 60 Les données sont fondées sur le recensement de la population de l'Indonésie de 2020 et les projections de la population pour les années 2020-2050.
- 61 Les données concernent l'année iranienne, qui commence le 21 mars et se termine le 20 mars de l'année suivante.
- 62 Données se rapportent au 1 janvier. Les données se réfèrent à la population résidente habituelle.
- 63 Données se rapportent au 30 avril.
- 64 Données se rapportent au 31 mai.
- 65 Données se rapportent au 30 juin. Y compris les données pour Jérusalem-Est et les résidents israéliens dans certains autres territoires occupés depuis 1967 par les forces armées israéliennes. Les données se rapportent aux citoyens israéliens et aux résidents permanents qui sont répertoriés dans le registre de la population.
- 66 Les chiffres étant arrondis, les totaux ne correspondent pas toujours rigoureusement à la somme des composants respectifs.
- 67 Données se rapportent au 1 janvier. Estimations postcensitaires.

Population estimates

Mid-year: thousands *[continued]*

Estimations de la population

Au milieu de l'année : en milliers d'habitants *[suite]*

- 106 Population estimates were derived from the Scenario 2 of the 2020 Census-Based Population Projections. Scenario 2 assumes that the total fertility rate of the Philippines will decline gradually from 2.1 in 2020 to 1.9 in 2055.
- 107 Data refer to usual resident population based on the 2014 Census. Without the data on districts from the left side of the river Nistru and municipality Bender.
- 108 Data are projections based on the 2008 Population and Housing Census.
- 109 Data are cohort component method projections using the projected figures for 2020 as the base population, parameters for fertility and mortality derived from 2010 South Sudan Household Health Survey, and considering the population closed to migration in this period.
- 110 Information provided by the Russian Federation. Includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.
- 111 Projections based on the 2022 Population Census.
- 112 Data refer to 1 January. Population statistics are compiled from registers.
- 113 Excludes data for Kosovo and Metohia.
- 114 Data refer to 30 June. Data refer to total population, which comprises Singapore residents and non-residents. Data exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference date.
- 115 Projections based on adjusted 2009 census counts.
- 116 Population statistics are compiled from registers. Data refer to registered resident population.
- 117 Data refer to legal resident population.
- 118 Including Palestinian refugees.
- 119 Data refer to 12 December. Data refers to 2019 Tokelau population count.
- 120 Data based on Address Based Population Registration System.
- 121 Estimates or projections based on the 2017 Population Census.
- 122 The Government of Ukraine has informed the United Nations that it is not in a position to provide statistical data concerning the Autonomous Republic of Crimea and the city of Sevastopol.
- 123 Data refer to 31 December. Data include non-national population.
- 124 Excluding Channel Islands (Guernsey and Jersey) and Isle of Man, shown separately, if available. Data refer to usual resident population.
- 125 Excluding U.S. Armed Forces overseas and civilian U.S. citizens whose usual place of residence is outside the United States. Postcensal estimates.
- 126 Including armed forces stationed in the area. Source: U.S. National Center for Health Statistics, National Vital Statistics Reports (NVSR).
- 127 Estimates based on the results of 1999 and in 2009 censuses.
- 128 Estimates based on the results of 2009 census and 2016 mini-census.
- 129 Estimates are based on the result of 2016 mini-census.
- 130 Data refer to 18 August.
- 131 Data refer to 20 April.

- 106 Les estimations de la population ont été dérivées du scénario 2 des projections démographiques fondées sur le Recensement de 2020. Selon le scénario 2 l'indice synthétique de fécondité des Philippines baissera progressivement, de 2,1 en 2020 à 1,9 en 2055.
- 107 Les données se rapportent à la population habituellement résidente et sont fondées sur le recensement de 2014. Sans les données sur les régions de la rive gauche de la rivière Nistru et la municipalité Bender.
- 108 Projections basées sur le recensement 2008 de la population et des logements.
- 109 Les données sont des projections de la méthode des composantes de cohorte utilisant les chiffres projetés pour 2020 comme population de base, les paramètres de fécondité et de mortalité dérivés de l'enquête sur la santé des ménages du Soudan du Sud de 2010, et prenant en compte la population fermée à la migration pendant cette période.
- 110 Informations fournies par la Fédération de Russie. Y compris les données statistiques sur la République autonome de Crimée et la ville de Sébastopol (Ukraine) temporairement occupées par la Fédération de Russie.
- 111 Projections fondées sur le recensement de la population de 2022.
- 112 Données se rapportent au 1 janvier. Les statistiques de la population sont compilées à partir des registres.
- 113 Sans les données pour le Kosovo et Metohie.
- 114 Données se rapportent au 30 juin. Les données se rapportent à la population totale composé des résidents de Singapour et les non résidents. Non compris les résidents hors de Singapour pour une période ininterrompue de 12 mois ou plus avant de la date de référence.
- 115 Projections fondées à partir des comptes rajustés du recensement de 2009.
- 116 Les statistiques de la population sont compilées à partir des registres. Les données concernent la population enregistrée résidente.
- 117 Les données concernent la population légalement résidente.
- 118 Y compris les réfugiés de Palestine.
- 119 Données se rapportent au 12 décembre. Les données se rapportent au dénombrement de la population tokélaouane de 2019.
- 120 Les données sont basées sur le registre national de la population basé sur l'adresse.
- 121 Estimations ou projections fondées sur le recensement de la population de 2017.
- 122 Le gouvernement Ukrainien a informé l'ONU qu'il n'est pas en mesure de fournir des données statistiques concernant la République autonome de Crimée et la ville de Sébastopol.
- 123 Données se rapportent au 31 décembre. Les données comprennent les non-nationaux.
- 124 Non compris les îles Anglo-Normandes (Guernesey et Jersey) et l'île de Man, qui font l'objet de rubriques distinctes, si disponible. Les données se réfèrent à la population résidente habituelle.
- 125 Non compris les militaires américains à l'étranger et les civils américains dont le lieu de résidence habituel est en dehors des États-Unis. Estimations postcensitaires.
- 126 Y compris les militaires en garnison sur le territoire. Source : US National Center for Health Statistics, National Vital Statistics Reports (NVSR).
- 127 Estimations fondées sur les résultats des recensement de la population de 1999 and 2009.
- 128 Estimaions fondées sur les résultats du recensement de 2009 et du mini-recensement de 2016.
- 129 Estimations fondées sur les chiffres du mini-recensement de 2016.
- 130 Données se rapportent au 18 août.
- 131 Données se rapportent au 20 avril.

United Nations Statistics Division, Demographic Statistics Database and country responses to the Monthly Bulletin of Statistics questionnaire.

Note:

Data refer to live births which occurred or were registered during the period indicated. For the purpose of international comparability, this table is limited to countries for which complete or virtually complete registration data exist.

1 Rate based on 30 or fewer events.

2 Excluding Faroe Islands and Greenland shown separately, if available.

3 Data refer to Japanese nationals in Japan only.

4 Excludes the islands of St. Brandon and Agalega.

5 Excludes data for Transnistria and the municipality of Bender.

6 Information provided by the Russian Federation. Includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

7 Excluding infants born alive of less than 28 weeks' gestation, of less than 1 000 g in weight and 35 cm in length, who die within seven days of birth. Information provided by the Russian Federation. Includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

8 Excludes data for Kosovo and Metohia.

9 The Government of Ukraine has informed the United Nations that it is not in a position to provide statistical data concerning the Autonomous Republic of Crimea and the city of Sevastopol.

10 Excluding Channel Islands (Guernsey and Jersey) and Isle of Man, shown separately, if available.

Division de statistique de l'ONU, base de données pour les statistiques démographiques et réponses des pays au questionnaire du Bulletin mensuel de statistique.

Note:

Les données se rapportent aux naissances vivantes intervenus ou enregistrés au cours de la période indiquée. Pour permettre la comparaison d'un pays à l'autre, ce tableau ne comprend que les pays où l'enregistrement de données es complet ou virtuellement complet.

- 1 Taux basés sur 30 cas ou moins.
- 2 Non compris les îles Féroé et le Groenland, qui font l'objet de rubriques distinctes, si disponible.
- 3 Les données se rapportent aux nationaux japonais au Japon seulement.
- 4 Non compris les îles St. Brandon et Agalega.
- 5 Les données ne tiennent pas compte de l'information sur la Transnistria et la municipalité de Bender.
- 6 Informations fournies par la Fédération de Russie. Y compris les données statistiques sur la République autonome de Crimée et la ville de Sébastopol (Ukraine) temporairement occupées par la Fédération de Russie.
- 7 Informations fournies par la Fédération de Russie. Y compris les données statistiques sur la République autonome de Crimée et la ville de Sébastopol (Ukraine) temporairement occupées par la Fédération de Russie. Non compris les nourrissons nés vivants de moins de 28 semaines de gestation, de poids inférieur à 1 000 g et de 35 cm de longueur, qui meurent dans les sept jours suivant leur naissance.
- 8 Sans les données pour le Kosovo et Metohie.
- 9 Le gouvernement Ukrainien a informé l'ONU qu'il n'est pas en mesure de fournir des données statistiques concernant la République autonome de Crimée et la ville de Sébastopol.
- 10 Non compris les îles Anglo-Normandes (Guernesey et Jersey) et l'île de Man, qui font l'objet de rubriques distinctes, si disponible.

United Nations Statistics Division, Demographic Statistics Database and country responses to the Monthly Bulletin of Statistics questionnaire.

Note:

Data refer to deaths which occurred or were registered during the period indicated. For the purpose of international comparability, this table is limited to countries for which complete or virtually complete registration data exist.

1 Rate based on 30 or fewer events.

2 Excluding Faroe Islands and Greenland shown separately, if available.

3 Data refer to Japanese nationals in Japan only.

4 Excludes the islands of St. Brandon and Agalega.

5 Excludes data for Transnistria and the municipality of Bender.

6 Information provided by the Russian Federation. Includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

7 Excluding infants born alive of less than 28 weeks' gestation, of less than 1 000 g in weight and 35 cm in length, who die within seven days of birth. Information provided by the Russian Federation. Includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

8 Excludes data for Kosovo and Metohia.

9 The Government of Ukraine has informed the United Nations that it is not in a position to provide statistical data concerning the Autonomous Republic of Crimea and the city of Sevastopol.

10 Excluding Channel Islands (Guernsey and Jersey) and Isle of Man, shown separately, if available.

Division de statistique de l'ONU, base de données pour les statistiques démographiques et réponses des pays au questionnaire du Bulletin mensuel de statistique.

Note:
Les données se rapportent aux décès vivantes intervenus ou enregistrés au cours de la période indiquée. Pour permettre la comparaison d'un pays à l'autre, ce tableau ne comprend que les pays où l'enregistrement de données es complet ou virtuellement complet.

- 1 Taux basés sur 30 cas ou moins.
- 2 Non compris les îles Féroé et le Groenland, qui font l'objet de rubriques distinctes, si disponible.
- 3 Les données se rapportent aux nationaux japonais au Japon seulement.
- 4 Non compris les îles St. Brandon et Agalega.
- 5 Les données ne tiennent pas compte de l'information sur la Transnistria et la municipalité de Bender.
- 6 Informations fournies par la Fédération de Russie. Y compris les données statistiques sur la République autonome de Crimée et la ville de Sébastopol (Ukraine) temporairement occupées par la Fédération de Russie.
- 7 Informations fournies par la Fédération de Russie. Y compris les données statistiques sur la République autonome de Crimée et la ville de Sébastopol (Ukraine) temporairement occupées par la Fédération de Russie. Non compris les nourrissons nés vivants de moins de 28 semaines de gestation, de poids inférieur à 1 000 g et de 35 cm de longueur, qui meurent dans les sept jours suivant leur naissance.
- 8 Sans les données pour le Kosovo et Metohie.
- 9 Le gouvernement Ukrainien a informé l'ONU qu'il n'est pas en mesure de fournir des données statistiques concernant la République autonome de Crimée et la ville de Sébastopol.
- 10 Non compris les îles Anglo-Normandes (Guernesey et Jersey) et l'île de Man, qui font l'objet de rubriques distinctes, si disponible.

87 For Tanganyika only.

88 For all urban only.

89 Base: 2016=100. The indices have been calculated by the Statistics Division of the United Nations from national indices.

90 Figures in thousands.

91 Figures in millions.

92 Figures in billions.

- 78 Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux. Pour population urbaine seulement.
- 79 Base : janvier 2018=100.
- 80 Base : décembre 2015=100.
- 81 UEMOA harmonisé l'indice des prix à la consommation.
- 82 Base : 2014=100. Les données se rapporte à l'indice national.
- 83 Non compris le poisson frais.
- 84 Moyenne sur 10 mois à l'exclusion des données de mai et juin.
- 85 Base : 1 juillet 2016 - 30 juin 2017=100.
- 86 Base : 1 juillet 2009 - 30 juin 2010=100.
- 87 Pour Tanganyika seulement.
- 88 Pour population urbaine seulement.
- 89 Base : 2016=100. Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 90 Chiffres en milliers.
- 91 Chiffres en millions.
- 92 Chiffres en milliards.

Producer price indices

2010=100 [continued]

Indices des prix à la production

2010=100 [suite]

- 1 The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 2 Data refer to goods sold both domestically and as exports. Manufacturing industry only.
- 3 Annual figures: average of 12 months ending 30 June of the year stated.
- 4 Base: 1 July 2005 - 30 June 2006=100.
- 5 Base: 1 July 2015 - 30 June 2016=100.
- 6 Base: 2016=100. Manufacturing industry only.
- 7 Excluding forestry and fishing.
- 8 Annual figures: using data for base period as weights, and not a simple average of the monthly indices.
- 9 Base: 2020=100.
- 10 Excluding forestry and fishing. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 11 Base: January 2020=100. Manufacturing industry only.
- 12 Base: January 2020=100.
- 13 Base: 2014=100.
- 14 Excluding fishing.
- 15 Manufacturing industry only.
- 16 Data refer to construction materials.
- 17 Manufacturing industry only. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 18 Base: 2015=100. Data refer to goods sold both domestically and as exports. Excluding forestry and fishing.
- 19 For government controlled areas. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 20 Excluding forestry.
- 21 Base: 2015=100.
- 22 Data refer to sections A-C of NACE Rev 2.
- 23 Data refer to sections B-E of NACE Rev 2.
- 24 Base: December 2013=100. Manufacturing industry only.
- 25 Annual figures: average of 12 months ending 30 June of the year stated. Base: January 2016=100.
- 26 Non-durable goods only.
- 27 Excludes the Overseas Departments; namely French Guiana, Guadeloupe, Martinique, Mayotte and Réunion. Excluding agriculture, forestry and fishing.
- 28 Base: 2021=100.
- 29 Excluding forestry and fishing. Includes the Overseas Departments, namely, French Guiana, Guadeloupe, Martinique, Mayotte and Réunion.
- 30 Excludes the Overseas Departments; namely French Guiana, Guadeloupe, Martinique, Mayotte and Réunion.
- 31 Base: 2021=100. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 32 Data refer to goods sold both domestically and as exports.
- 33 Excluding forestry and fishing. Monthly data are seasonally weighted, while the annual average is derived from equally weighted monthly data.
- 34 Excluding agriculture, forestry, fishing, and water supply; sewerage, waste management and remediation activities.
- 35 Excluding imported products.
- 36 Base: 2011-2012=100.
- 37 Primary articles include food, non-food articles and minerals.
- 38 Base: fiscal (solar) year 2016 (21 March 2016 - 20 March 2017)=100. Data refer to the periods of the solar year in Iran.
- 39 Mining and quarrying and manufacturing industries only. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 40 Base: 2018=100.
- 41 Annual figures: using data for base period as weights, and not a simple average of the monthly indices. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 42 Base: 2018=100. Manufacturing industry only.
- 43 Excluding petroleum.
- 44 Including hunting.
- 45 The index refers to private consumption.
- 46 Refers to PPIs for agriculture outputs, which include some support services for agriculture.
- 47 Includes prices for exported goods and for service industries. Manufacturing industry only.
- 48 Refers to the inputs index for all industries, which is also referred to as intermediate consumption.
- 49 Coverage is for 21 major cities.
- 50 Base: 2012=100. Refers to the "General Wholesale Price Index".
- 51 Base: 2013=100.
- 52 Base: 2011=100. Excluding data for the districts from the left side of the river Nistru and the municipality of Bender.
- 53 Data are calculated by types of economic activities in accordance with OKVED 2.
- 54 Base: December 2010=100.
- 55 Excluding forestry. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 56 Base: 2023=100.
- 57 Refers to the "Singapore Manufactured Products Price Index". It monitors price movements of domestically manufactured goods which are sold either within Singapore or exported.
- 58 Refers to the "Import Price Index", which includes data on re-exports. It monitors prices of imports which are either retained for domestic market or re-exported.
- 59 Base: Same month in 2015=100.
- 60 Base: 2012=100.
- 61 Data refer to final manufactured goods.
- 62 Data refer to intermediate manufactured goods.
- 63 Data are calculated using a "Laspeyres chain-linked" formula. The indices have been calculated by the Statistics Division of the United Nations from national indices.
- 64 Base: 1 July 2009 - 30 June 2010=100.
- 65 Data refer to domestic products used in the crop and animal production; hunting and related service activities.

- 1 Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 2 Industries manufacturières seulement. Les données se réfèrent à des biens vendus au pays et aux exportations.
- 3 Chiffres annuels : moyennes de douze mois finissant le 30 juin de l'année.
- 4 Base : le 1 juillet 2005 au 30 juin 2006=100.
- 5 Base : le 1 juillet 2015 au 30 juin 2016=100.
- 6 Base : 2016=100. Industries manufacturières seulement.
- 7 Non compris la sylviculture et la pêche.
- 8 Chiffres annuels : utilisant des données pour la période de base comme des poids, et pas une simple moyenne des indices mensuels.
- 9 Base : 2020=100.
- 10 Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux. Non compris la sylviculture et la pêche.
- 11 Base : janvier 2020 = 100. Industries manufacturières seulement.
- 12 Base : janvier 2020 = 100.
- 13 Base : 2014=100.
- 14 Non compris la pêche.
- 15 Industries manufacturières seulement.
- 16 Les données se rapportent aux matériaux de construction.
- 17 Industries manufacturières seulement. Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 18 Base : 2015=100. Les données se réfèrent à des biens vendus au pays et aux exportations. Non compris la sylviculture et la pêche.
- 19 Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux. Pour les zones contrôlées par le gouvernement.
- 20 Non compris la sylviculture.
- 21 Base : 2015=100.
- 22 Les données se réfèrent à des sections A-C de la NACE Rev 2.
- 23 Les données se réfèrent à des sections B-E de la NACE Rev 2.
- 24 Base : décembre 2013=100. Industries manufacturières seulement.
- 25 Base : janvier 2016=100. Chiffres annuels : moyennes de douze mois finissant le 30 juin de l'année.
- 26 Les biens non-durables seulement.
- 27 Non compris l'agriculture, la sylviculture et la pêche. Non compris les départements d'outre mer; c'est-à-dire la Guyane française, la Guadeloupe, la Martinique, la Mayotte et la Réunion.
- 28 Base : 2021=100.
- 29 Non compris la sylviculture et la pêche. Y compris les départements d'outre mer, c'est-à-dire la Guyane française, la Guadeloupe, la Martinique, la Mayotte et la Réunion.
- 30 Non compris les départements d'outre mer; c'est-à-dire la Guyane française, la Guadeloupe, la Martinique, la Mayotte et la Réunion.
- 31 Base : 2021=100. Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 32 Les données se réfèrent à des biens vendus au pays et aux exportations.
- 33 Les données mensuelles sont des variations saisonnières de la pondération, alors que la moyenne annuelle est dérivée de la pondération égale des données mensuelles. Non compris la sylviculture et la pêche.
- 34 Non compris l'agriculture, la sylviculture, la pêche, et la production et distribution d'eau ; assainissement, gestion des déchets et dépollution.
- 35 Non compris les produits importés.
- 36 Base : 2011-2012=100.
- 37 Les articles primaires comprennent des articles des produits alimentaires, non-alimentaires et des minéraux.
- 38 Base : année fiscale (solaire) 2016 (21 mars 2016 - 20 mars 2017) = 100. Les données se réfèrent aux périodes de l'année solaire en Iran.
- 39 Industries extractives et industries manufacturières seulement. Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 40 Base : 2018=100.
- 41 Chiffres annuels : utilisant des données pour la période de base comme des poids, et pas une simple moyenne des indices mensuels. Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 42 Base : 2018=100. Industries manufacturières seulement.
- 43 Non compris le pétrole.
- 44 Y compris la chasse.
- 45 L'indice se réfère à la consommation privée.
- 46 Se réfère à des IPP pour les sorties de l'agriculture, qui comprennent certains services de soutien à l'agriculture.
- 47 Industries manufacturières seulement. Y compris les prix pour les biens exportés et pour des industries de services.
- 48 Se réfère à l'indice des entrées pour toutes les industries, qui est aussi appelée la consommation intermédiaire.
- 49 La couverture est de 21 grande villes.
- 50 Base : 2012=100. Se réfère à "l'indice général des prix de gros".
- 51 Base : 2013=100.
- 52 Base : 2011=100. Exclut les données pour les districts du côté gauche de la rivière Nistru et la municipalité de Bender.
- 53 Les données sont calculées selon les types d'activités économiques conformément à la norme OKVED 2.
- 54 Base : décembre 2010=100.
- 55 Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux. Non compris la sylviculture.
- 56 Base : 2023=100.
- 57 Se réfère à "l'indice des prix de produits manufacturés de Singapour". Il surveille les mouvements des prix des biens fabriqués localement qui sont vendus soit à Singapour ou exportés.
- 58 Se réfère à "l'indice des prix à l'importation", qui comprend des données sur les réexportations. Il surveille les mouvements des prix des importations qui sont soit vendus pour le marché domestique ou réexporté.
- 59 Base : le même mois en 2015=100.
- 60 Base : 2012=100.
- 61 Les données se réfèrent aux biens manufacturés finaux.
- 62 Les données se réfèrent aux biens manufacturés intermédiaires.
- 63 Les données sont calculées en utilisant une formule de "Laspeyres en chaîne liées". Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.
- 64 Base : 1 juillet 2009 - 30 juin 2010=100.
- 65 Les données se rapportent aux produits domestiques utilisés dans la culture et la production animale, chasse et services annexes.

5
Producer price indices
2010=100 *[continued]*
Indices des prix à la production
2010=100 *[suite]*

66 Excluding foods and feeds production.
67 Base: 2016=100.

66 Non compris les produits alimentaires et d'affouragement.
67 Base : 2016=100.

Source:

International Civil Service Commission (ICSC), New York, ICSC database.

Note:

Consumption patterns may vary from those of the local population and therefore the indices cannot be considered as reflecting the general cost-of-living in the cities.

1 Rates are those relevant to calculation of cost-of living indexes for international officials.

2 Housing consists of rent, utilities and domestic service.

3 The "total" index was calculated on the basis of the cost of government or subsidized housing which is normally lower than prevailing rents.

4 Publication of the RPI for Estonia and New Zealand will be suspended as of December 2022 as cost-of-living surveys have not been recently conducted by the ICSC for these locations. For more information, contact the ICSC

5 Due to the lack of reliable CPI data, reported RPI for Venezuela may not adequately reflect the evolution of price levels.

6 Publication of the RPI for Zimbabwe has been suspended until results from a new cost-of-living survey can be implemented. For more information, contact the ICSC.

Source :

Commission de la fonction publique internationale, (CFPI) la base de données du CFPI, New York.

Note :

Consommation peut différer de celle de la population locale, ces indices ne peuvent pas être considérés comme reflétant le coût-de-la-vie général dans les villes considérées.

1 Les taux sont ceux employés pour calculer les indices du coût de la vie des fonctionnaires internationaux.

2 L'habitation se compose du loyer, de l'électricité, du gaz et de l'eau et des services domestiques.

3 L'indice "total" a été calculé sur la base du coût de l'habitation fournie par le gouvernement ou subventionnée normalement moins élevé des loyers courants.

4 La publication des indices pour l'Estonie et la Nouvelle-Zélande sera suspendue décembre 2022 à cause du manque des enquêtes récentes sur le coût de la vie. Pour en savoir plus, veuillez contacter la CFPI.

5 En raison de l'absence de données sur l'IPC, il est possible que l'indice fournie pour le Venezuela ne reflète pas l'évolution du niveau des prix.

6 La publication de l'indice pour Zimbabwe est suspendue jusqu'à ce que la mise en oeuvre d'une nouvelle enquête sur le coût de la vie. Pour en savoir plus, veuillez contacter la CFPI.

United Nations Statistics Division, country responses to the Monthly Bulletin of Statistics questionnaire, supplemented by international and national publications.

- Figures refer to the waterborne cargo statistics. Transport by water includes transport by ocean and by river.
- Containerized cargoes only.
- For government controlled areas.
- Commercial harbors only.
- Goods exported by sea, including goods of foreign freighters, by enterprises of all types of economic activities.

Registration of new motor vehicles

Thousands *[continued]*

Immatriculations de véhicules automobiles neufs

En milliers *[suite]*

Source:

United Nations Statistics Division, country responses to the Monthly Bulletin of Statistics questionnaire, supplemented by international and national publications.

Note:

New passenger cars and commercial vehicles registered during the period and put into circulation for the first time.

- 1 Data based on sales.
- 2 Including semi-trailers and agriculture tractors.
- 3 For government controlled areas. Including second-hand vehicles.
- 4 Including motorcycles, tractors, and special purpose vehicles.
- 5 Including second-hand vehicles. Passenger cars and lorries only.
- 6 Including second-hand vehicles.
- 7 Private cars only.
- 8 Quarterly data represented by sum of months.
- 9 Including special purpose vehicles.
- 10 Including used vehicles reported for the first time, motorcycles and scooters.
- 11 Data refer to vehicles effectively sold, not registered vehicles.
- 12 Data refer to the net number of new and cancelled registrations for passenger cars (not more than 10 seats), vans (11 to 22 seats), trucks/lorries and special purpose vehicles.

Source:

Division de la Statistique des Nations Unies, réponses des pays au questionnaire du Bulletin mensuel de statistique.

Note:

Les données se rapportent aux nouvelles voitures de tourisme et aux nouveaux véhicules utilitaires mis pour la première fois en circulation et immatriculés pendant la période considérée.

- 1 Données basées sur les ventes.
- 2 Y compris les semi-remorques et tracteurs agricoles.
- 3 Pour les zones contrôlées par le gouvernement. Y compris les véhicules usagés.
- 4 Y compris les motocyclettes, tracteurs, et véhicules à usages spéciaux.
- 5 Voitures de particulières et camions seulement. Y compris les véhicules usagés.
- 6 Y compris les véhicules usagés.
- 7 Les voitures privées seulement.
- 8 Données trimestrielles représentée par la somme des mois.
- 9 Y compris les véhicules à usages spéciaux.
- 10 Y compris les véhicules usagés immatriculés pour la première fois, les motocyclettes et les scooters.
- 11 Les données se rapportent aux véhicules effectivement vendus, et non aux véhicules homologués.
- 12 Les données se réfèrent au nombre net de nouveaux enregistrements et d'annulations pour les voitures particulières (moins de 10 sièges), les fourgonnettes (11 à 22 sièges), les camions et les véhicules à usages spéciaux.

Technical notes

Population

Table 1: Mid-year population estimates refer to 1 July of the reference year unless otherwise stated, and are presented as reported by national statistical authorities to the *United Nations Demographic Yearbook* or the *Monthly Bulletin of Statistics*. The data are presented in thousands, rounded by the Statistics Division. Estimates are coded in the table as either de facto (DF) or de jure (DJ). A de facto population consists of all persons who are physically present in the country or area at the reference date, whether or not they are usual and/or legal residents. The de jure population, by contrast, includes all usual residents of the given country or area, whether or not they were physically present in the area at the reference date. By definition, therefore, de facto and de jure estimates are not entirely comparable.

Furthermore, international comparability of the mid-year population estimates is affected by the lack of strict conformity to either de facto or de jure or concepts with regard to inclusions and exclusions of particular individuals in the population. Significant exceptions with respect to inclusions and exclusions of specific population groups are footnoted when they are known.

Tables 2 and 3: Crude birth rates and crude death rates provide simple measures of natality and mortality, respectively, in a population over a given period. Tables 2 and 3 present annualized rates per 1 000 population.

A basic problem that may affect international comparability of crude birth rates and crude death rates relates to deviations from the standard statistical definition of live births. The standard definition of a live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered live-born. Furthermore, death is defined as the permanent disappearance of all evidence of life at any time after live birth has taken place (post-natal cessation of vital functions without capability of resuscitation). International comparability may be affected by the lack of strict conformity to standard statistical definitions by some countries which exclude from their live birth statistics infants who are born alive but die before the registration of the birth or within the first 24 hours of life.

The rates may also be affected by the quality and limitations of the population estimates that are used for their computation and by population age-sex structures to which they relate.

Price indices

The original base periods for the national series presented in the Consumer Price Indices and Producer Price Indices tables of the *Monthly Bulletin of Statistics (MBS)* can vary widely. Therefore, for presentation of these data, the *MBS* has adopted a uniform base period, which is currently 2010=100. When a country does not compile or provide its Consumer Price Indices' and/or Producer Price Indices' data in the base published in the *MBS* (2010=100), the data in the original base periods are recalculated by the United Nations Statistics Division by dividing the index for each date shown by the index for the year 2010 (or a more recent year for which data are available in the same series) and multiplying the quotient by 100. This operation does not involve any change in the weighting systems used by the countries.

Table 4: The consumer price index (CPI) is a current social and economic indicator that is constructed to measure changes over time in the general level of prices of consumer goods and services that households acquire, use or pay for consumption. A consumer price index is usually estimated as a series of summary measures of the period-to-period proportional change in the prices of a fixed set of consumer goods and services of constant quantity and characteristics, acquired, used or paid for by the reference population. Each summary measure is constructed as a weighted average of a large number of elementary aggregate indices. Each of the elementary aggregate indices is estimated using a sample of prices for a defined set of goods and services obtained in, or by residents of, a specific region from a given set of outlets or other sources of consumption goods and services. Unless otherwise specified, the general (all items) and food and non-alcoholic beverages consumer price indices with national coverage are shown in the table for each country.

Detailed explanations of the methods used to compute the consumer price indices may be found on the countries' or areas' national statistical office websites (consult http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp) or the ILO website at: www.ilo.org/ilostat.

Table 5: Producer prices are prices at which producers sell their output on the domestic market. Producer price indices normally cover the prices of the characteristic products of agriculture, forestry, and fishing, mining and quarrying, manufacturing, and electricity, gas and water supply. Prices are normally measured in terms of transaction prices, including non-deductible indirect taxes less subsidies, in the case of domestically produced goods and import duties and other non-deductible indirect taxes less subsidies in the case of imported goods. The Laspeyres index number formula is generally used. The price indices for each country are arranged according to the following scheme:

- a. Components of supply for the domestic market:
 - Domestic supply
 - Domestic production for domestic market
 - Agriculture, forestry and fishing (section A as defined in ISIC Rev. 4)
 - Industrial products (sections B-E as defined in ISIC Rev. 4)
 - Imported goods
 - b. Stage of processing (for goods manufactured for domestic markets, irrespective whether they are locally produced or imported):
 - Raw materials
 - Intermediate goods
 - c. End-use (for goods sold on domestic markets, irrespective whether they are locally produced or imported):
 - Consumer goods
 - Capital goods.

Table 6: The International Civil Service Commission regularly compiles index numbers which measure the relative cost-of-living of United Nations officials working in various cities. The indexes compare the US Dollar costs of a representative basket of goods and services between a duty station and New

York City, the base of the UN Common System. These indexes are updated to reflect price changes over time at the duty station and New York, movements in the exchange rate of the local currency vis-à-vis the United States dollar and to adjust for expenditures made by the staff outside the duty station. Detailed explanations of the methods used to compute the indexes may be found on the ICSC Homepage at: <http://icsc.un.org/col-rpi.asp>.

Transport

Table 7: Unless otherwise stated, the figures represent the weight of all goods (including packing) and livestock in external trade loaded on and unloaded from sea-going vessels of all flags at the ports of the country in question. (A vessel is said to be sea-going if part at least of its voyage, while carrying the goods in question, is by sea). The goods excluded are: mail, bullion, specie, passengers' baggage, bunkers, ships' stores, ballast, ships and other floating appliances when delivered as goods without being loaded on other ships, government stores when carried in government vessels, and goods transhipped from an importing vessel to an exporting vessel. Goods unloaded into or loaded from bonded warehouses are included.

Table 8: Passenger cars cover road motor vehicles designed for the conveyance of passengers and seating not more than nine persons. Taxis, jeep-type vehicles and station wagons are included. Commercial vehicles cover buses seating more than nine persons and lorries (trucks) having their own motive power. Road tractors and semi-trailer combinations are included. Trailers without motive power and farm tractors are excluded.

Table 9: The monthly data presented refer to revenue scheduled traffic of airlines registered in the country, i.e. passenger-kilometres performed or freight tonne-kilometres performed for which remuneration is received and on flights performed according to a published timetable as reported to ICAO by its Member States. When data are reported to ICAO on an annual or quarterly basis, they are shown in this table equally distributed on a monthly basis for the reporting period. Only the data reported by ICAO Member States are included in this table. For additional data, please consult the ICAO's website (<http://stats.icao.int>). Annual data are presented there which may include both ICAO estimates for missing data (for carriers that do not report each month) and reported data.

Revenue scheduled flights: Flights scheduled and performed for remuneration according to a published timetable, or so regular or frequent as to constitute a recognizably systematic series, which are open to direct booking by members of the public; and extra section flights occasioned by overflow traffic from scheduled flights.

Passenger-kilometres performed: A passenger-kilometre is performed when a passenger is carried one kilometre. Passenger-kilometres equal the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.

Freight tonne-kilometres performed: A freight tonne-kilometre is performed when a metric tonne of freight is carried one kilometre. Freight tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of freight, and express and diplomatic bags carried on each flight stage by the stage distance. For ICAO statistical purposes, freight includes express and diplomatic bags but not passenger baggage.

Flight stage: A flight stage is the operation of an aircraft from take-off to its next landing. Furthermore, a flight stage is classified as either international or domestic.

International flight stage: A flight stage with one or both terminals in the territory of a State, other than the State in which the air carrier has its principal place of business.

Domestic flight stage: A flight stage not classifiable as international, i.e. domestic flight stages include all flight stages flown between points within the domestic boundaries of a State by an air carrier whose principal place of business is in that State. Flight stages between a State and territories belonging to it, as well as any flight stages between two such territories, should be classified as domestic. This applies even though a stage may cross international waters or over the territory of another State.

Additional terms and descriptions used in civil aviation statistics are available at <http://www.icaodata.com/Terms.aspx>.

International merchandise trade

Table 10: The purpose of this table is to provide a summary of total exports within and between important economic and geographic areas of the world. The economic and geographic groupings in this table are in accordance with those of Table 34 in this issue.

Export data in this table are largely comparable to that shown in Table 34 except that Table 34 contains revised data for total exports which are not incorporated into this table if the corresponding revised data by country of destination are not available. Also, the regional totals shown in Table 34 have been adjusted to exclude the re-exports of countries comprising each region. This adjustment is not made in this table since re-exports are often not available by destination.

The data approximate total exports of all countries and areas of the world. They are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published in table 37 each quarter in this Bulletin (March, June, September and December). Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted to approximate calendar years. The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the total exports, but are excluded from all regions of destination.

Tables 11 and 12: The purpose of these tables is to provide data on the network of flows of broad groups of commodities within and between important economic and geographic areas of the world. The regional analysis in these tables is in accordance with that of Table 34 in this issue.

Export data in these tables are largely comparable to that shown in Table 34 except that Table 34 contains revised data for total exports which are not incorporated into this table if the corresponding revised data at the commodity/destination level are not available. Also, the regional totals shown in Table 34 have been adjusted to exclude the re-exports of countries comprising each region. This adjustment is not made in this table since re-exports are often not available by commodity and by destination. The commodity classification is in accordance with the United Nations' Standard International Trade Classification (SITC), Revision 3.

The data are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published quarterly in Table 37 in this Bulletin (March, June, September and December). Where official figures are not available estimates based on the imports reported by partner

countries and on other subsidiary data are used. Some official national data have been adjusted to approximate the commodity groupings of the SITC. The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the world totals for each commodity group and in total exports, but are excluded from all regions of destination. Major regional aggregates are presented for each commodity category, as well as the four largest exporting countries in the European Union and the two largest exporting countries in the 'Other developed economies' group.

Notes techniques

Population

Tableau 1 : Sauf indication contraire, les estimations de la population au milieu de l'année se réfèrent au 1^{er} juillet de l'année de référence. Présentées en milliers et arrondies par la Division de statistique de l'ONU, ces données sont fournies par les services nationaux de statistique à l'*Annuaire démographique* ou au *Bulletin mensuel de statistique* des Nations Unies. Les estimations se réfèrent à la population de fait (« DF » dans le tableau) ou à la population de droit (« DJ » dans le tableau). La population de fait comprend toutes les personnes présentes dans le pays ou la zone à la date de référence, tandis que la population de droit comprend toutes celles qui résident habituellement dans le pays ou la zone, qu'elles y aient été ou non présentes à la date de référence. Par définition, la population de fait et la population de droit ne sont donc pas rigoureusement comparables entre elles.

En outre, la comparabilité internationale des estimations de la population au milieu de l'année est affectée par le manque de conformité aux concepts de la population de fait ou de la population de droit en ce qui concerne les inclusions et les exclusions de certaines personnes dans la population. Les exceptions notables en ce qui concerne les inclusions et les exclusions de certains groupes de population sont indiquées dans les notes quand elles sont connues.

Tableaux 2 et 3 : Les taux bruts de natalité et les taux bruts de mortalité fournissent respectivement des mesures simples de natalité ou de mortalité d'une population pendant une période donnée. Les tableaux 2 et 3 présentent les taux annuels pour 1 000 habitants.

Les variations par rapport aux définitions établies des naissances vivantes sont le principal obstacle à la comparabilité internationale des taux bruts de natalité et les taux bruts de mortalité. La définition standard d'une naissance vivante est l'expulsion ou l'extraction complète du corps de la mère, indépendamment de la durée de la gestation, d'un produit de la conception qui, après cette séparation, respire ou manifeste tout autre signe de vie, tel que battement de cœur, pulsation du cordon ombilical ou contraction effective d'un muscle soumis à l'action de la volonté, que le cordon ombilical ait été coupé ou non et que le placenta soit ou non demeuré attaché; tout produit d'une telle naissance est considéré comme « enfant né vivant ». En outre, le décès est la disparition permanente de tout signe de vie à un moment quelconque postérieur à la naissance vivante (cessation des fonctions vitales après la naissance sans possibilité de réanimation). Cette définition ne comprend donc pas les morts fœtales. La comparabilité internationale peut être affectée par le manque de conformité stricte aux définitions statistiques standards de certains pays qui excluent de leurs statistiques de l'état civil des enfants nés vivants et décédés avant l'enregistrement de leur naissance ou dans les premières 24 heures de vie.

Le calcul des taux bruts de natalité et des taux bruts de mortalité peuvent également être affectés par la qualité ou la fiabilité des estimations et la composition par âge et par sexe de la population.

Indices des prix

Les périodes de base de référence des séries nationales concernant les indices des prix à la consommation ou à la production qui figurent dans le *Bulletin mensuel de statistique (BMS)* peuvent varier considérablement. En conséquence, pour la présentation de ces données, le *BMS* a adopté une période de référence uniforme, qui est à présent 2010 = 100. Dans le cas où un pays ne compile pas ou ne fournit pas ses indices des prix dans cette base de référence (2010 = 100), les données seront recalculées par la Division de statistique des Nations Unies en divisant l'indice pour chaque période indiquée par l'indice de l'année 2010 (ou une année plus récente pour laquelle des données sont disponibles dans la même série) et en multipliant le quotient par 100. Cette opération n'implique aucun changement dans les systèmes de pondération utilisés par les pays.

Tableau 4 : L'indice des prix à la consommation est un indicateur social et économique couramment utilisé pour mesurer les variations au cours du temps du niveau général des prix des biens et services acquis, utilisés ou payés par les ménages pour leur consommation. Un indice des prix à la consommation est généralement estimé à partir d'une suite de mesures synthétiques des variations relatives, d'une période à l'autre, des prix d'un ensemble fixe de biens et de services de consommation constants en quantité et par leurs caractéristiques, acquis, utilisés ou payés par la population de référence. Chaque mesure synthétique est obtenue comme une moyenne pondérée d'un grand nombre d'indices de prix d'agrégats élémentaires. L'indice de chaque agrégat élémentaire est estimé au moyen d'un échantillon de prix pour un ensemble fixe de biens et de services que se procurent les individus de la population de référence dans une région donnée, ou qui habitent cette région, auprès d'un ensemble spécifié de points de vente ou auprès d'autres fournisseurs de biens et de services de consommation. Les indices des prix à la consommation généraux et de l'alimentation et boissons non alcoolisées sont présentés dans le tableau.

Les détails des explications à propos des méthodes employées pour calculer les indices des prix à la consommation peuvent être trouvés sur les sites web des offices statistiques nationaux (http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp) ou sur le site Internet du BIT : www.ilo.org/ilostat.

Tableau 5 : Le prix à la production est le prix auquel le producteur vend ses produits sur le marché intérieur ou à l'exportation. Les indices de prix à la production comprennent en général le prix des produits provenant de l'agriculture, de la sylviculture et de la pêche, des industries extractives (mines et carrières), de l'industrie manufacturière ainsi que le prix de l'électricité, du gaz et de l'eau. Les prix établis sont d'ordinaire ceux auxquels s'effectue la transaction, y compris les impôts indirects non déductibles mais non compris les subventions dans le cas des produits de l'économie nationale et y compris les taxes à l'importation et autres impôts indirects non déductibles mais non compris les subventions dans le cas des produits importés. On a généralement utilisé la formule de Laspeyres et, pour la présentation, on a recalculé les indices nationaux, le cas échéant, en prenant comme base de référence 2010=100.

Les indices sont présentés pour chaque pays suivant la classification ci-après :

a. Eléments de l'offre pour le marché intérieur :

Offre intérieure

Production nationale pour le marché intérieur

Agriculture, sylviculture et pêche (section A tel que défini dans la CITI Révision 4)

Produits industriels (sections combinées B à E telles que définies dans la CITI Révision 4)

Produits d'importation

b. Stades de la transformation (pour les biens manufacturés pour les marchés nationaux, indépendamment du fait qu'ils sont produits localement ou importés) :

Matières premières

Biens intermédiaires

- c. Utilisation finale (pour les produits vendus sur les marchés nationaux, indépendamment du fait qu'ils sont produits localement ou importés) :

Biens de consommation

Biens d'équipement

Tableau 6 : La Commission de la Fonction Publique Internationale compile régulièrement les indices mesurant le coût de la vie relatif aux fonctionnaires des Nations Unies en poste dans diverses villes du monde. Les indices comparent, en dollars EU, le coût d'un panier représentatif de biens et services entre une ville donnée et New York, base du système commun de l'ONU. Ces indices sont mis à jour pour refléter le changement de prix temporels dans les villes-postes et à New York, les mouvements du taux de change de la monnaie locale vis-à-vis du dollar EU et pour ajuster les dépenses faites par le personnel en dehors de la ville-poste. Les détails des explications à propos des méthodes employées pour calculer les indices peuvent être trouvés sur le site Internet de la CFPI : <http://icsc.un.org/col-rpi.asp>.

Transports

Tableau 7 : Sauf indication contraire, les données représentent le poids (emballage compris) de l'ensemble des marchandises (y compris bétail sur pied) embarquées ou débarquées au titre du commerce extérieur par des navires de haute mer sous tous pavillons dans les ports du pays considéré (un navire est dit de haute mer si une partie au moins de son voyage, pendant qu'il assure le transport des marchandises, se fait par mer). Sont exclus : courrier, or et argent en lingots, espèces, bagages des passagers, contenu des soutes, provisions de bord, lest, bateaux et autres engins flottants livrés en tant que marchandises sans être chargés sur navire, approvisionnements du gouvernement lorsqu'ils sont transportés à bord de navires de l'Etat ou gratuitement à bord de navires de la marine marchande, marchandises transbordées d'un navire importateur à un navire exportateur. Les marchandises en provenance ou à destination d'un entrepôt en douane sont comprises.

Tableau 8 : Voitures de tourisme comprennent les véhicules automobiles destinés au transport des personnes et ayant moins de dix places. Y compris les taxis, les jeeps et autres véhicules analogues et les « station wagons ». Véhicules utilitaires comprennent autobus ayant plus de neuf places pour passagers et les camions équipés d'un moteur. Y compris les ensembles tracteur-remorque et semi-remorque. Les données ne comprennent ni les remorques sans moteur destinées à être attelées à un autobus, à un camion ou à un tracteur ni les tracteurs agricoles.

Tableau 9 : Les données mensuelles présentées ont trait aux vols payants prévus et réalisés par les transporteurs aériens enregistrés dans le pays déclarant, c'est-à-dire au trafic voyageurs en nombre de passagers-kilomètre réalisés, ou au trafic de fret en nombre de tonnes-kilomètres, réalisés contre rémunération et suivant un horaire publié, tels qu'ils ont été communiqués à l'OACI par les États membres. Lorsque les données communiquées à l'Organisation sont établies chaque année ou chaque trimestre, elles sont également réparties entre les mois de la période considérée, indiquées par mois dans ce tableau. Seules les données communiquées par les États membres de l'OACI sont prises en compte dans ce tableau. Pour des données supplémentaires, consulter le site Web de l'Organisation (<http://stats.icao.int>). Parmi les données annuelles présentées, certaines peuvent recouvrir à la fois des estimations des chiffres manquants établies par l'OACI (pour les transporteurs qui ne communiquent pas de données chaque mois) et des chiffres communiqués.

Vols payants réguliers : Vols prévus et réalisés contre rémunération suivant un horaire publié, ou dont la régularité ou la fréquence sont propres à constituer des séries systématiques évidentes, et qui sont ouverts à la réservation directe de la part du public, ainsi que les vols supplémentaires nécessités par un excédent de trafic sur les vols réguliers.

Passagers-kilomètres réalisés : Un passager-kilomètre est réalisé lorsqu'un passager est transporté sur un kilomètre. Le nombre de passagers-kilomètres est égal à la somme des produits obtenus en multipliant le nombre des passagers payants transportés sur chaque étape par la longueur de l'étape. Le chiffre obtenu est égal au nombre de kilomètres parcourus par tous les passagers.

Tonnes-kilomètres de fret réalisées : Une tonne-kilomètre de fret est réalisée lorsqu'une tonne métrique de fret est transportée sur une distance de 1 kilomètre. Le nombre de tonnes-kilomètre de fret réalisées est égal à la somme des produits obtenus en multipliant le nombre de tonnes de fret, messageries et valise diplomatique comprises, transportées sur chaque étape du vol par la longueur de l'étape. Aux fins des statistiques de l'OACI, le fret comprend les messageries et la valise diplomatique, mais non les bagages des passagers.

Étape : Une étape est le parcours d'un aéronef, depuis le décollage jusqu'au premier atterrissage suivant. De plus, une étape est soit internationale, soit intérieure, selon le cas.

Étape internationale : C'est une étape ayant une de ses extrémités, ou les deux, sur le territoire d'un État autre que celui où le transporteur aérien a son principal établissement.

Étape intérieure : C'est toute étape qui ne peut pas être classée comme internationale. En d'autres termes, les étapes intérieures comprennent toutes les étapes parcourues entre des points situés dans les limites des frontières d'un État, par un transporteur aérien ayant son principal établissement dans cet État. Les étapes parcourues entre un État et les territoires qui lui appartiennent, de même que toute étape parcourue entre deux de ces territoires, doivent être classées comme intérieures, même si elles traversent l'espace situé au-dessus des eaux internationales ou du territoire d'un autre État.

On trouvera encore d'autres termes et désignations employés dans les statistiques de l'aviation civile sur le site Web suivant : <http://www.icaodata.com/Terms.aspx>.

Commerce international

Tableau 10 : Le but de ce tableau est de fournir un aperçu du courant des marchandises entre les grandes régions importantes économiques et géographiques du monde et de leur commerce intérieur. Les groupes économiques et géographiques de ce tableau sont conformes à ceux du Tableau 34 de ce numéro.

Les données des exportations dans ce tableau sont en générale comparables aux chiffres qui sont inclus dans le Tableau 34, exceptées celles du Tableau 34 qui comportent des révisions aux exportations totales qui ne sont pas inclus dans ce tableau si les révisions des données correspondantes aux pays de destination ne sont pas disponibles. De plus, les totaux régionaux inclus dans le Tableau 34 ont été ajustés pour exclure les réexportations des pays qui comprennent la région. Cet ajustement n'est pas fait dans ce tableau parce que des réexportations ne sont pas disponibles fréquemment par destination.

Les données approchées des exportations totales de tous pays et régions du monde. Elles sont basées sur les chiffres des exportations officielles

nationales convertis en dollars É.-U. selon les facteurs de conversion publiés chaque trimestre dans le tableau 37 de ce bulletin (mars, juin, septembre et décembre). Quand les chiffres officiels ne sont pas disponibles on a recours à des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées qu'elles correspondent aux années civiles. Les données comprennent les exportations de catégorie spéciale (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination.

Tableaux 11 et 12 : Le but de ces tableaux est de fournir un aperçu du courant des marchandises entre les régions importantes économiques et géographiques du monde et de leur commerce intérieur. L'analyse régionale dans ces tableaux est conforme à celle du Tableau 34 du présent numéro.

Les données des exportations dans ces tableaux sont en générale comparables aux chiffres qui sont inclus dans le Tableau 34, exceptées celles du Tableau 34 qui comportent des révisions aux exportations totales qui ne sont pas inclus dans ce tableau si les révisions des données correspondantes au niveau de marchandise/destination ne sont pas disponibles. De plus, les totaux régionaux inclus dans le Tableau 34 ont été ajustés pour exclure les re-exportations des pays qui comprennent la région. Cet ajustement n'est pas fait dans ce tableau parce que des re-exportations ne sont pas disponibles fréquemment par marchandise et par destination. La classification par marchandise utilisée est la Classification type pour le commerce international (CTCI) Révision 3 des Nations Unies.

Les données sont basées sur les chiffres des exportations officielles nationales convertis en dollars É.-U. selon les facteurs de conversion publiés chaque trimestre dans un tableau spécial dans ce Bulletin (mars, juin, septembre et décembre). Quand les chiffres officiels ne sont pas disponibles on a recours à des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées qu'elles correspondent aux groupes des marchandises de la CTCI. Les données comprennent les exportations de catégorie spéciale (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les totaux de chaque groupe de marchandise et dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination. Les majeurs agrégats régionaux sont montrés pour chaque catégorie de marchandise, de même que les quatre plus grands pays exportateurs dans la Union Européenne et les deux plus grands pays exportateurs dans le groupe 'Autres économies développées'.

Conversion coefficients and factors — Coefficients et facteurs de conversion

| <i>Metric units Unités métriques</i> | <i>British and U.S. equivalents Equivalents en unités britanniques et des Etats-Unis</i> | <i>British and U.S. units Unités britanniques et des Etats-Unis</i> | <i>Metric equivalents Equivalent en unités métriques</i> |

Data definitions

A

agricultural production index: Based on the sum of price-weighted quantities of different agricultural commodities produced after deductions of quantities used as seed and feed weighted in a similar manner. All the indices at the country, regional and world levels are calculated by the Laspeyres formula. Production quantities of each commodity are weighted by average international commodity prices in the base period and summed for each year. To obtain the index, the aggregate for a given year is divided by the average aggregate for the base period. The commodities covered in the computation of indices of agricultural production are all crops and livestock products originating in each country. Practically all products are covered, with the main exception of fodder crops (1*, 2003, p. xvii).

agricultural products: CPC Vers. 1.1 (8), divisions 01 and 02: cereals, vegetables, fruit and nuts, oil seeds and oleaginous fruit, living plants, cut flowers and flower buds, flower seeds and fruit seeds, vegetable seeds, beverages and spice crops, unmanufactured tobacco, sugar beet and sugar cane, raw vegetable materials not elsewhere classified, live animals and animal products.

B

base period: The period of time for which data used as the base of an index number, or other ratio, have been collected. This period is frequently one year but it may be as short as one day or as long as the average of a group of years (6).

C

capital goods: Pure-bred breeding animals, metal containers for storage or transport, hand tools, armoured and reinforced safes and the like of base metal, boilers and auxiliary plant, turbines, engines and motors, agricultural and horticultural or forestry machinery, construction and mining machinery, manufacturing machinery, self-propelled works trucks and other lifting, handling, loading or unloading machinery, weighing machinery and other appliances, office machines, audio and video apparatus and telecommunications equipment, electrical machines and apparatus, transportation installations and floating structures, boilers, devices, appliances and instruments, meters and other measuring instruments and apparatus, cinematographic cameras and projectors, time measurement instruments, amusement equipment, office or desk equipment of base metal, tailors' dummies and displays, motorcars and other motor vehicles, trailers and semi-trailers, containers specially designed and equipped for transport, rail locomotives, tenders, coaches, railway or tramway passenger coaches, freight and maintenance cars, helicopters, space craft (including satellites) and spacecraft launch vehicles, balloons and dirigibles, tankers, fishing vessels, refrigerated vessels, ships, tugs, outboard motors, bicycles, trailers, aeroplanes and other aircraft, gliders, rowing boats and canoes, rafts (9, divisions 4 and 5).

civil aviation traffic: Traffic for which remuneration is received, carried on flights performed according to a published timetable and by extra flights occasioned by overflow traffic from scheduled flights (3).

consumer goods: Food and non-alcoholic beverages, alcoholic

beverages, tobacco and narcotics, clothing and footwear, hosing, water, electricity, gas and other fuels, furnishings, household equipment, health, transport, communication, recreation and culture, education, restaurants and hotels, miscellaneous goods and services (10, p.83).

consumer prices index, all items: Measures changes over time in the general level of prices of goods and services that a reference population acquires, uses or pays for consumption. A consumer price index is estimated as a series of summary measures of the period-to-period proportional change in the prices of a fixed set of consumer goods and services of constant quantity and characteristics, acquired, used or paid for by the reference population. Each summary measure is constructed as a weighted average of a large number of elementary aggregate indices. Each of the elementary aggregate indices is estimated using a sample of prices for a defined set of goods and services obtained in, or by residents of, a specific region from a given set of outlets or other sources of consumption goods and services (4, chap.7). See also index numbers, Laspeyres.

consumer prices index, food: Measures changes over time in the general level of prices of food goods that a reference population requires, uses or pays for consumption (4, chap. 7). See also index number, Laspeyres.

crude birth rate: The fraction where the numerator is the total number of births in a population during a given period and the denominator is the total number of person-years lived by the population during that period, generally approximated by the size of the population at the mid-point of the period multiplied by the length of the period in years. Usually stated per 1,000 (21). Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of the pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached (26, definition 3.1).

crude death rate: Generally an annual rate consisting of the ratio of the annual number of deaths occurring during a calendar year to the number exposed to the risk of dying during the same period, equivalent to the mean population or average population for the period (21, para. 401). Death is the permanent disappearance of all evidence of life at any time after live birth has taken place (post-natal cessation of vital functions without capability of resuscitation). This definition therefore excludes foetal deaths (23, para. 46 (2)).

D

domestic production: Goods and services created by the productive activity of resident institutional units (25, para. 6.84).

domestic supply: See producers/wholesale prices indices.

E

exports of goods: Goods which subtract from the stock of material resources of a country by leaving its economic territory. In the general trade system, the definition of the statistical territory of a country coincides with its economic territory (12, paras. 14-66).

* Numbers in parenthesis refer to numbered entries in the list of references which follow the data definitions section.

exports value, all goods: Equivalent basis as imports value. See imports value, all goods.

F

flight stage: A flight stage is the operation of an aircraft from take-off to its next landing. Furthermore, a flight stage is classified as either international or domestic (2).

flight stage, domestic: A flight stage with both terminals within the domestic boundaries of a State by an air carrier whose principal place of business is in that State. Flight stages between a State and territories belonging to it, as well as any flight stages between two such territories, should be classified as domestic. This applies even though a stage may cross international waters or over the territory of another State (2).

flight stage, international: A flight stage with one or both terminals in the territory of a State, other than the State in which the air carrier has its principal place of business (2).

food production index: Food production includes commodities that are considered edible and that contain nutrients. Accordingly, coffee and tea are excluded because they have practically no nutritive value (1, p. ix).

freight loaded: The weight of all goods (including packing) and livestock which, at the ports of the country in question, were either loaded into national or foreign sea-going vessels for unloading in another country, or unloaded from national or foreign sea-going vessels after having been load in another country, including goods into or from bonded warehouses (24, pp. 254-255).

freight tonne-kilometres performed: A freight tonne-kilometre is performed when a metric tonne of freight is carried one kilometre. Freight tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of freight, and express and diplomatic bags carried on each flight stage by the stage distance. For ICAO statistical purposes, freight includes express and diplomatic bags but not passenger baggage (2).

freight unloaded: The weight of all goods (including packing) and livestock which, at the ports of the country in question, were either loaded into national or foreign sea-going vessels for unloading in another country, or unloaded from national or foreign sea-going vessels after having been load in another country, including goods into or from bonded warehouses (24, pp. 254-255).

I

imported goods prices indices: See imports of goods and producers/wholesale prices indices.

imports of goods: Goods which add to the stock of material resources of a country by entering its economic territory. Goods simply being transported through a country (goods in transit) or temporarily admitted (except for goods for inward processing) do not add to the stock of material resources of a country and are not included in the international merchandise trade statistics. In many cases, a country's economic territory largely coincides with its customs territory, which is the territory in which the customs law of a country applies in full (12, paras. 14 and 66).

imports value, all goods: "The transaction value, that is the price actually paid or payable for the goods when sold for export to the country of importation ..., provided: (a) that there are no restrictions as to the disposition or use of the goods by the buyer other than restrictions which: (i) are imposed or required by law or by the public authorities in

the country of importation; (ii) limit the geographical area in which the goods may be resold; or (iii) do not substantially affect the value of the goods; (b) that the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued; (c) that no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with the provisions of Article 8; and (d) that the buyer and seller are not related, or where the buyer and seller are related, that the transaction value is acceptable for customs purposes ... " (12, annex C, based on World Trade Organization Agreement in Valuation).

index number, Laspeyres: A form of index number where prices, quantities or other units of measure over time are weighted according to their values in a specified base period (6).

industrial products: Goods produced by resident institutional units in industries of mining, manufacturing and electricity, gas and water (25).

infant deaths: Infant deaths under one year of age (23, ID3). See also deaths rates, crude.

intermediate goods: Goods consumed as inputs by a process of production, excluding fixed assets (25, para. 6.213).

L

livestock: All domestic animals irrespective of their age and the place or purpose of their breeding.

M

manufacturing: Comprises tabulation category D and divisions 15-37 in the International Standard Industrial Classification of All Economic Activities, Revision 3. It is defined as the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand, whether it is done in a factory or in the worker's home, and whether the products are sold at wholesale or retail. Included are assembly of component parts of manufactured products and recycling of waste materials (19).

mining and quarrying: Extraction, dressing and beneficiating of minerals occurring naturally: Solids, such as coal and ores; liquids, such as crude petroleum; and gases, such as natural gas. Mining includes underground and surface mines, quarries and wells and all supplemental activities for dressing and beneficiating ores and other crude materials, such as crushing, screening, washing, cleaning, grading milling, flotation, melting, pelleting, topping and other preparations needed to render the material marketable (20, p.27).

motor vehicles: CPC Vers. 1.1 (8), subclass 49113: Motor cars and other vehicles principally designed for the transport of persons (except public-transport type vehicles specially designed for travelling on snow, and golf cars and similar vehicles).

motor vehicles, new, registration: Registrations of new passenger cars and commercial motor vehicles put into circulation for the first time (24, p. 253).

P

passenger-kilometres performed: A passenger-kilometre is performed when a passenger is carried one kilometre. Passenger-kilometres equal the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The

resultant figure is equal to the number of kilometres travelled by all passengers (2).

population, estimate of total: The total population of a country may comprise either all usual residents of the country (de jure population) or all persons present in the country (de facto population) at the time of the census. For purposes of international comparisons, the de facto definition is recommended (21).

population, official mid-year estimates: Estimates of the de facto population on 1 July provided by national statistical offices (11, notes to table 3).

producer price indices: The amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any value-added tax, or similar deductible tax, invoiced to the purchaser. It includes any transport charges invoiced separately by the producer (25, para. 6.51). In principle, the PPI should include service industries, but in practice it is limited to the domestic agricultural and industrial sectors. The prices should be farm-gate prices for the agricultural sector and ex-factory for the industrial sector. The indices are computed using the Laspeyres formula, unless otherwise indicated in the country notes. Subindices are occasionally included for the PPI (5, p. XVI). See also index number, Laspeyres.

R

raw materials: Unprocessed food and beverages, industrial supplies, fuels and lubricants, mainly for industry (9, p. 2).

S

scheduled revenue flights: Flights scheduled and performed for remuneration according to a published timetable, or so regular or frequent as to constitute a recognizably systematic series, which are open to direct booking by members of the public; and extra section flights occasioned by overflow traffic from scheduled flights (2).

Définitions des données

B

biens de consommation : Produits alimentaires et boissons non alcoolisées, boissons alcoolisées, tabac et stupéfiants, articles d'habillement et chaussures, logement, eau, gaz, électricité et autres combustibles, meubles, articles de ménage et entretien courant du foyer, santé, transports, communications, loisirs et culture, enseignement, restaurants et hôtels, biens et services divers (10, p. 83).

biens d'équipement : Animaux reproducteurs de race pure, récipients métalliques pour le stockage et le transport, outils à main, coffres-forts et articles similaires en métaux communs, chaudières et appareils auxiliaires, turbines, moteurs, machines, appareils et engins agricoles, horticoles ou sylvicoles, machines et appareils utilisés pour la construction et l'industrie minière, machines et appareils industriels, chariots autpropulsés et autres machines et engins de levage, manutention, chargement et déchargement, appareils et instruments de pesage, machines et appareils de bureau, appareils audio et vidéo et équipement de télécommunication, machines et appareils électriques, matériel et équipements de transport et engins flottants, chaudières, dispositifs, appareils et instruments, compteurs et autres instruments et appareils pour la mesure, caméras et projecteurs cinématographiques, compteurs de temps, matériel récréatif, matériel et fourniture de bureau en métaux communs, mannequins et articles pour étalages, voitures de tourisme et autres véhicules automobiles, remorques et semi-remorques, conteneurs spécialement conçus et équipés pour le transport, locomotives et locotracteurs, tenders, automotrices et autorails, voitures à voyageurs, wagons de service et wagons et wagonnets pour le transport de marchandises, hélicoptères, véhicules spatiaux, y compris les satellites, et leurs véhicules lanceurs, ballons et dirigeables, bateaux-citernes, bateaux de pêche, bateaux frigorifiques, bateaux, remorqueurs, moteurs pour bateaux de type hors-bord, bicyclettes, remorques, avions et autres aéronefs, planeurs, bateaux à rames et canoës, radeaux (9, divisions 4 et 5).

biens intermédiaires : Biens consommés en entrée d'un processus de production, à l'exclusion des actifs fixes (25, par. 6.213).

C

cheptel : Totalité des animaux domestiques quels que soient leur âge, et le lieu ou le but de leur élevage.

D

décès d'enfants de moins d'un an : Mort infantile (23, ID3). Voir également taux brut de mortalité.

E

estimation de la population totale : La population totale d'un pays se compose soit de toutes les personnes résidant habituellement dans le pays (population de droit), soit de l'ensemble des personnes présentes dans le pays au moment du recensement (population de fait). Aux fins de comparaisons internationales, il est recommandé de se servir de la définition correspondant à la population de fait (21).

étape : Une étape est le parcours d'un aéronef, depuis le décollage jusqu'au premier atterrissage suivant. De plus, une étape est soit internationale, soit intérieure, selon le cas (2).

étape intérieure : Les étapes intérieures comprennent toutes les étapes parcourues entre des points situés dans les limites des frontières d'un État, par un transporteur aérien ayant son principal établissement dans cet État. Les étapes parcourues entre un État et les territoires qui lui appartiennent, de même que toute étape parcourue entre deux de ces territoires, doivent être classées comme intérieures, même si elles traversent l'espace situé au-dessus des eaux internationales ou du territoire d'un autre État (2).

étape internationale : C'est une étape ayant une de ses extrémités, ou les deux, sur le territoire d'un État autre que celui où le transporteur aérien a son principal établissement (2).

I

immatriculations de véhicules automobiles neufs : Immatriculations de véhicules automobiles neufs à usage privé et commercial mis en circulation pour la première fois (24, p. 253).

indice de la production agricole : L'indice de la production agricole est fondé sur la somme des quantités (pondérées par les prix) des différents produits agricoles, après déduction des quantités utilisées comme semences ou aliments pour animaux (pondérées de la même façon). La formule utilisée pour le calcul de tous les indices, aux niveaux national, régional ou mondial, est celle de Laspeyres. La production de chaque produit est pondérée par la moyenne des cours internationaux du produit pendant la période de base et les quantités produites chaque année sont additionnées. Pour obtenir l'indice, on divise la production totale pour une année donnée par la production moyenne de la période de base. Les produits pris en compte dans le calcul de l'indice de la production agricole sont l'ensemble des produits de l'agriculture et de l'élevage de chaque pays. La quasi-totalité des produits est prise en compte, la principale exception étant les aliments pour animaux (1, 1995, p. ix).

indice de la production vivrière : Entrent dans la production vivrière tous les produits jugés comestibles, qui contiennent des nutriments. Le café et le thé en sont donc exclus, n'ayant pratiquement pas de valeur nutritive (1, p. ix).

indice de Laspeyres : Forme d'indice établi en affectant aux prix, quantités ou autres unités de mesure un coefficient de pondération calculé sur la période de référence (6).

indice des prix à la consommation (ensemble des marchandises) : Mesure des variations au cours du temps du niveau général des prix des biens et services acquis, utilisés ou payés par la population de référence pour sa consommation. Cet indice est estimé à partir d'une suite de mesures synthétiques des variations relatives, d'une période à l'autre, des prix d'un ensemble fixe de biens et de services de consommation constants en quantité et par leurs caractéristiques, acquis, utilisés ou payés par la population de référence. Chaque mesure synthétique est obtenue comme une moyenne pondérée d'un grand nombre d'indices de prix d'agréats élémentaires. L'indice de chaque agrégat élémentaire est estimé au moyen d'un échantillon de prix pour un ensemble fixe de biens et de services que se procurent les individus de la population de référence dans une région donnée, ou qui habitent cette région, auprès d'un ensemble spécifié de points de vente ou auprès d'autres fournisseurs de biens et de services de consommation (4, chap. 7). Voir également indice de Laspeyres.

indice des prix à la consommation (produits alimentaires) : Mesure des variations au cours du temps du niveau général des prix des produits alimentaires acquis, utilisés ou payés par la population de référence pour sa consommation (4, chap. 7). Voir également indice de Laspeyres.

indices des prix à la production : Montant que le producteur reçoit de l'acheteur pour une unité de bien ou de service produite, diminuée de toute taxe sur la valeur ajoutée, ou de tout impôt déductible similaire, facturée à l'acquéreur. Il exclut tout frais de transport facturés séparément par le producteur (25, par. 6.51). En principe, l'IPP devrait inclure les services, mais en pratique il ne recouvre que l'agriculture et l'industrie. L'indice doit être établi à partir des prix sortis d'exploitation pour le secteur agricole et des prix départ-usine pour le secteur industriel. Les indices sont établis à partir de la formule de Laspeyres, sauf indication contraire dans les notes concernant chaque pays. On fait parfois figurer à cette section des sous-indices se rapportant à l'IPP (5, p. XVI). Voir également indice de Laspeyres.

indices des prix des biens importés : Voir produits d'importation, indices des prix à la production et des prix de gros.

industries extractives : Extraction, préparation et enrichissement des minéraux que l'on rencontre dans la nature à l'état solide (charbon et minerais par ex.), à l'état liquide (pétrole brut par ex.), ou gazeux (gaz naturel par ex.). On comprend dans les industries extractives les mines souterraines et à ciel ouvert, les carrières et les puits, ainsi que toutes les activités complémentaires nécessaires pour le traitement et l'enrichissement de minerais et autres minéraux bruts, telles que le concassage, le criblage, le débouillage, l'égrappage, le triage, le broyage, la flottation, la fusion, le bouletage, l'étêtage et autres opérations propres à rendre les produits commercialisables (20, p. 27).

industries manufacturières : Activités recensées à la catégorie de classement D et aux divisions 15 à 37 de la Classification internationale type, par industrie, de toutes les branches d'activité économique (troisième révision). Les industries manufacturières ont pour objet la transformation physique ou chimique de matériaux et composants en de nouveaux produits, que l'activité de transformation soit effectuée par des machines automatiques ou manuellement, qu'elle ait lieu dans une usine ou au domicile du travailleur, que les produits résultants soient vendus en gros ou au détail. Les activités manufacturières recouvrent également l'assemblage des composants constituant les produits manufacturés et les activités de recyclage (19).

M

marchandises débarquées : Poids de l'ensemble des marchandises (y compris l'emballage) et du bétail, qui ont été soit chargés, dans les ports du pays concerné, à bord de navires nationaux ou étrangers aux fins d'être débarqués dans un autre pays, soit débarqués de navires nationaux ou étrangers après avoir été embarqués dans un autre pays. Le fret débarqué comprend aussi les marchandises entrant dans les entrepôts de douane ou en sortant (24, p. 254 et 255).

marchandises embarquées : Poids de l'ensemble des marchandises (y compris l'emballage) et du bétail, qui ont été soit chargés, dans les ports du pays concerné, à bord de navires nationaux ou étrangers aux fins d'être débarqués dans un autre pays, soit débarqués de navires nationaux ou étrangers après avoir été embarqués dans un autre pays. Le fret embarqué comprend aussi les marchandises entrant dans les entrepôts de douane ou en sortant (24, p. 254 et 255).

matières premières : Produits alimentaires et boissons, approvisionnements industriels, combustibles et lubrifiants n'ayant pas subi de transformation et essentiellement destinés à l'industrie (9, p. 2).

O

offre intérieure : Voir indice des prix à la production et des prix de gros.

P

passagers-kilomètres réalisés : Un passager-kilomètre est réalisé lorsqu'un passager est transporté sur un kilomètre. Le nombre de passagers-kilomètres est égal à la somme des produits obtenus en multipliant le nombre des passagers payants transportés sur chaque étape par la longueur de l'étape. Le chiffre obtenu est égal au nombre de kilomètres parcourus par tous les passagers (2).

période de base : La période de base est la période où ont été collectées les données utilisées comme base pour un indice ou un autre ratio. Elle est souvent d'une année, mais peut être d'une journée, ou à l'inverse la moyenne d'un groupe d'années (6).

population, estimation en milieu d'année : L'estimation de la population en milieu d'année, qui vise la population de fait au 1^{er} juillet, est celle que fournissent les bureaux nationaux de statistique (11, notes du tableau 3).

production intérieure : Biens et services créés par l'activité productive des unités institutionnelles résidentes (25, par. 6.84).

produits agricoles : CPC version 1.1 (8), divisions 1 et 2 : céréales, légumes, fruits, même à coques, huiles et fruits oléagineux, plantes vivantes, fleurs et boutons de fleurs coupées, graines de plantes cultivées principalement pour leurs fleurs ou leurs fruits, graines de légumes, épices et cultures pour boissons, tabacs bruts ou non fabriqués, betteraves à sucre et cannes à sucre, matières premières végétales non classées ailleurs, animaux vivants et produits du règne animal.

produits d'exportation : Biens dont la sortie du territoire économique fait diminuer le stock des ressources matérielles. Dans le système du commerce général, le territoire statistique d'un pays coïncide avec son territoire économique (12, par. 14 à 66).

produits d'importation : Biens dont l'entrée sur le territoire économique fait augmenter le stock des ressources matérielles du territoire économique du pays considéré. Les biens simplement transportés à travers le pays (biens en transit) ou admis ou expédiés temporairement (à l'exception des biens destinés au perfectionnement actif) ne font pas augmenter le stock des ressources matérielles d'un pays et ne sont donc pas à inclure dans les statistiques du commerce international. Dans de nombreux cas, le territoire économique d'un pays coïncide pratiquement avec son territoire douanier, c'est-à-dire le territoire sur lequel la législation douanière s'applique de plein droit (12, par. 14 et 66).

produits industriels : Biens produits par les unités institutionnelles résidentes dans les industries extractives, les industries de transformation et dans les secteurs de l'électricité, du gaz et de l'eau (25).

T

taux brut de mortalité : Il s'agit généralement d'un taux annuel, qui est le quotient du nombre annuel des décès observés dans une population au cours d'une année civile, divisé par l'effectif exposé au risque de décès pendant la même période, soit l'effectif moyen de cette

population (21, par. 401). Le Décès est la Disparition permanente de tout signe de vie à un moment quelconque postérieur à la naissance vivante (cessation des fonctions vitales après la naissance sans possibilité de réanimation). Cette définition ne comprend donc pas les morts foetales (23, par. 46, (2)).

taux brut de natalité : Le taux brut de natalité, généralement exprimé en taux pour mille, est obtenu en divisant le nombre des naissances dans une population par le nombre d'années-homme vécue par la population au cours de la même période, dont l'approximation généralement utilisée est l'effectif de la population au point médian de la période multiplié par le nombre d'années de la période (21). Naissance vivante est l'expulsion ou extraction complète du corps de la mère, indépendamment de la durée de la gestation, d'un produit de la conception qui, après cette séparation, respire ou manifeste tout autre signe de vie, tel que battement de coeur, pulsation du cordon ombilical ou contraction effective d'un muscle soumis à l'action de la volonté, que le cordon ombilical ait été coupé ou non et que le placenta soit demeuré ou non attaché (26, définition 3.1).

tonnes-kilomètres de fret réalisées : Une tonne-kilomètre de fret est réalisée lorsqu'une tonne métrique de fret est transportée sur une distance de 1 kilomètre. Le nombre de tonnes-kilomètre de fret réalisées est égal à la somme des produits obtenus en multipliant le nombre de tonnes de fret, messageries et valise diplomatique comprises, transportées sur chaque étape du vol par la longueur de l'étape. Aux fins des statistiques de l'OACI, le fret comprend les messageries et la valise diplomatique, mais non les bagages des passagers (2).

trafic de l'aviation civile : Trafic payant sur des vols réguliers, suivant un horaire publié, et sur des vols supplémentaires motivés par la surcharge des vols réguliers (3).

V

valeur d'exportation (ensemble des marchandises) : Base semblable à celle de la valeur d'importation. Voir valeur d'importation.

valeur d'importation (ensemble des marchandises) : "Valeur transactionnelle, c'est-à-dire le prix effectivement payé ou à payer pour les marchandises lorsqu'elles sont vendues pour l'exportation à destination du pays d'importation [...], pour autant : (a) Qu'il n'existe pas de restrictions concernant la cession ou l'utilisation des marchandises par l'acheteur, autres que les restrictions qui : (i) Sont imposées ou exigées par la loi ou par les autorités publiques du pays d'importation; (ii) Limitent la zone géographique dans laquelle les marchandises peuvent être revendues; ou (iii) N'affectent pas substantiellement la valeur des marchandises; (b) Que la vente ou le prix n'est pas subordonné à des conditions ou à des prestations dont la valeur n'est pas déterminable pour ce qui se rapporte aux marchandises à évaluer; (c) Qu'aucune partie du produit de toute revente, cession ou utilisation ultérieure des marchandises par l'acheteur ne revient directement ou indirectement au vendeur, sauf si un ajustement approprié peut être opéré en vertu des dispositions de l'article 8; et (d) Que l'acheteur et le vendeur ne sont pas liés ou, s'ils le sont, que la valeur transactionnelle est acceptable à des fins douanières [...]" (12, annexe C, d'après l'Accord de l'Organisation mondiale du commerce relatif à l'évaluation).

véhicules automobiles : CPC version 1.1 (8), sous-classe 49113 : voitures de tourisme et autres véhicules principalement conçus pour le transport des personnes (autres que les véhicules automobiles pour le transport en

commun des personnes, les véhicules spécialement conçus pour se déplacer sur la neige et les véhicules spéciaux pour le transport des personnes sur les terrains de golf et véhicules similaires).

vols payants réguliers : Vols prévus et réalisés contre rémunération suivant un horaire publié, ou dont la régularité ou la fréquence sont propres à constituer des séries systématiques évidentes, et qui sont ouverts à la réservation directe de la part du public, ainsi que les vols supplémentaires nécessités par un excédent de trafic sur les vols réguliers (2).
